

STOLEN BASE PREGAME REPORT

Bristol Blues vs. Sample Opponent | 2026-05-02

OPPOSING CATCHER

Catcher, Sample | Backstop+ 117.5 | ELITE

SBA: 29 | RCS: 17 | RCS%: 37.0%

Opposing Pitcher: Pitcher, Sample (Right-Handed)

STEAL PROBABILITY BY PITCH TYPE & COUNT

Pitch Type (n, %)	0-0	Hitter Ahead	Even	Pitcher Ahead	Full
Fastball (217, 54.4%)	69%	57%	54%	60%	29%
Breaking Ball (108, 27.1%)	79%	69%	67%	72%	42%
Off-Speed (74, 18.5%)	69%	56%	54%	59%	29%

GREEN = green light YELLOW = read it, run only on a great jump RED = hold

BEST CHANCE: 0-0 count (72% blended) | AVOID: a Full count (33% blended)

Model: NECBL steal-probability regression (n ≈ 300, MAE ≈ 3.5 pts), baseline by pitch category adjusted for this catcher's actual throw speed & exchange time, pitcher handedness, and count.

Movement data (IVB/Horz Break) not used when unavailable pregame.

Blended percentage = steal probability weighted by this pitcher's actual pitch mix (counts/percentages shown in the table above), giving the realistic odds for a given count before the pitch type is known.
